Four Ways to Learn

Large Group Classes

Taught by celebrity instructors, experts, and presenters from the coolest museums, zoos, and institutions, our live online classes offer students of all ages a fun and engaging way to learn.

May 10: Join Alyssa Carson for an interactive exploration of Earth's cosmic neighborhood and to learn what happens during eclipses.

April 26: Join the Maryland Center for History and Culture to step into the (well-worn) shoes of an American patriot in 1776.

April 27: Join Johnny Morris' Wonders of Wildlife National Museum & Aquarium to learn all about frogs and toads.

May 12: Join game designer and teenage tech entrepreneur, Samaira Mehta, to learn to code by playing games that'll get you up and moving. You'll even design and code an actual video game using what you've learned! Come ready to play; after all, coding is a game.

Free Self Study

Learning Lab offers adaptive assessments and personalized learning plans to help focus where the most improvement is needed. And our full library of practice tools, aligned to academic standards, can help your student do it at their own pace. All for free.

- Integral of the rate of change
- Modeling rates of change
- Optimization, both global and local extrema
- Understanding the limiting process
- Proportional Relationships
- Using algebra

Practice Problems & Videos: Available in the free Learning Lab, our practice tools and how-to videos help your student learn at their own pace.

What Your Child Should Know

Adaptive Assessments

[Learn More](#)

Learn from the absolute best

We choose only the best educators for our students. Each applicant must pass a rigorous vetting process, including simulations, background checks, and interviews. We also look for virtual teaching experience to ensure they're fully qualified to instruct your child.

KIMBERLY

Elementary Educator
Masters in School Counseling
Known for: Helping students build confidence and feel at ease

VIANNA
